Wood's Double Cleaned, Treated Seed Grains

GROWN FROM REGISTERED OR CERTIFIED STOCK SEED 99% PURE

CERTIFIED AND REGISTERED SEED OFFERED SUBJECT TO PASSING FINAL BIN INSPECTION

We Treat all Wheat, Oats and Barley to insure better stands and disease-free crops.

We grow many thousand acres from the finest Registered or Certified Stock. No crop is planted in a field where other small grain grew last season. All fields are carefully rogued and inspected for certification.

BARLEY TREATED. Sow 2 bus. per acre.

LEE COLD PROOF CERTIFIED	1.75	1.80

Fulwood

Outyielded all other oats on the recommended list in the Piedmont section of N. C., on a 5-year average. Was second highest yielding in the Coastal test. Also recommended in Virginia for February planting. In eastern Virginia fall or spring planting.

Fulwoods are nearer to the type of oats most desired by all farmers, shortest strawed oat entered in N. C. and Va. tests; they ripen uniformly; slightly earlier than Woodgrain. Our tests show they stand better on rich land, and under high fertility conditions than other varieties.

EARLYGRAIN OATS

Two weeks earlier than Fulgrain and about 5 to 7 inches taller; excellent for early hay, grazing or grain. Earlygrains are not from a Victoria cross and therefore not susceptible to Victoria blight. Usually escape rusts due to earliness. In trials in Richmond and Blacksburg Earlygrain withstood the severe winter as well as Lee Cold Proof Oats.

Wakeland Wheat (New Variety)

A new variety of early maturing wheat, recommended for use in areas where Anderson, Atlas 66 and Redheart are used. It has done exceptionally well in eastern Virginia and North Carolina. Short straw, very little lodging, two weeks earlier than Thorne. Yields up to 55 bus. per acre. This new variety seems to adapt itself to high fertilization or rich lands, without lodging, more so than other varieties. Supply limited.

Seneca Wheat

Is a twin sister of Thorne, identical except it yields more, has higher test weight per bushel, best grain quality and is replacing it. It looks like Thorne, big, long, solid heads, copper color, medium tall, very stiff straw, resists storms, winter mosaic and loose smut; stools well. Virginia recommends it. Low in lodging.

Thorne Wheat

Most popular wheat in the Upper South, in smut, mosaic, mildew and winter resistance. Stands up well; combines easy; large heads; big plump grain, good milling quality. Recommended in North Carolina mountains.

Anderson Wheat

Stands well and resistant to leaf rust. Straw is midtall to tall and kernels large, dark red in color. High in percentage protein and grain quality.

Try Earlygrain Oats (2 weeks earlier than Fulgrain) and Crimson Clover planted together to be harvested for seed at the same time. Suggest using 1½ bu. oats with 12 lbs. Clover for excellent grazing and seed harvest.

ALFALFA SEED, Oklahoma Approved.

This variety was developed by natural selection in Oklahoma from seed introduced into that section many years ago. This approval by the certifying agency in Oklahoma indicates that the seed traces to fields of hardy origin. This seed should not be confused with Oklahoma Common which in some instances is not suited to Virginia. Recently released data by V.P.I. shows that over a ten year period the Oklahoma strain yielded more hay than that of Kansas origin in the Piedmont and Coastal Plains areas of Virginia.

KENTUCKY 31, The Most Popular Tall Fescue

Forms a thick, tough turf that holds up cattle when wet, withstands heavy tramping, ideal for golf fairways, athletic fields, parks, airfields, parade grounds or lawns where Ky. Blue dies out. Its strong roots open up hard subsoil, adds organic matter, prevents erosion on steep banks, roadsides, terraces or waterways.

Conditions of Sale: The seeds, bulbs and plants listed here have been sold and are delivered upon the condition that if they are not true to name and kind or are not as otherwise described on the label or container, the seller's liability is limited to the purchase price thereof. If this condition is not satisfactory, they should be returned at once for proper credit.

Postpaid Prices apply to Va., N. C., W. Va., Md., Del., N. J., Penn.

Postage on Field Seed to Other States:
To S. C., Ga., Ky., Tenn., Oho, Ind., N. Y., New England and Mich., add 5c per pound to postpaid prices.

To Ala., Ark., Fla., Ill., Iowa, La., Miss., Mo., and Wisc., add 7c per pound.

To Texas, Okla., Kansas and Neb., add 9c per lb. to postpaid prices.

Wood's Bird Scatter Food

Attracts doves, quail, turkey and other game birds to your farm, ducks and geese to your marshes or song birds to your home.

In winter, especially February and March, little native food is left. Birds range far to find it. Help birds through this critical period by feeding **WOOD'S BIRD SCATTER FOOD**. It furnishes nourishment and warmth in the coldest weather. Birds never forget where they found food when they needed it.

Birds, like humans, need a variety of foods to keep them healthy and able to withstand the hardships of winter. Our formula has a wide assortment of ingredients, all beneficial and relished by game birds. It has no weed seed to grow the next summer.

Feed Wood's Bird Scatter Food regularly during cold winter months, especially during snows.

PLANTING AND CARE OF A LAWN

The first requirements for a lovely lawn is the preparation of a good, firm seed bed. The soil should be plowed or spaded when it is dry enough to work well. It should be pulverized to a depth of five inches. Remove stones and roots.

On each 100 sq. ft. (10x10), dig in 5 lbs. lime, 5 lbs. fertilizer (such as Agrico) and a soil conditioner like Peat Moss, compost, or 5 lbs. of organic plant food like Sheep Manure. Rake smooth.

Broadcast seed evenly. Cover lightly with a rake. Roll or pat firm. Water with fine spray. Soak thoroughly.

Each spring and fall fertilize with half the above amounts. For bare spots and under trees cut close, rake surface soil loose, broadcast fertilizer and seed heavily. Roll firm, then water until thoroughly wet.

Cut regularly when 2½ inches high. Don't cut shorter than one inch. In hot weather don't cut shorter than 2 inches.

Don't remove clippings unless long and heavy. They add mulch and fertility. Water in evenings during hot, dry weather. One good soaking is much better than several sprinklings.

Wood's Permanent Pasture and Hay Mixtures

Sow 25 lbs. per acre. 100-lb. bags, \$32.00 5-bag lots, \$31.50

Pasture Mixture 1, for light gravelly or sandy soil

Pasture Mixture 2, for good loam or clay soil

Pasture Mixture 3, for moist bottom land

Hay Mixture 6, for light gravelly or sandy soil

Hay Mixture 7, for good loam or clay soil

Hay Mixture 8, for moist bottom land

Southern Permanent Pasture and Hay Mixture 12 produces tremendous yields of the finest pasture and hay on both light and heavy soils in the Southern Coastal area.

Experiment station tests show yields of pasture and hay increase as more seed per acre is sown, up to 25 lbs. and as more different compatible clovers and grasses are added.

They concluded: "Using more than one legume in a mixture is a good insurance investment because species differ in adaptability to soil, climatic and biological growth factors."

Our mixtures proved superior for 4 generations contain 6 grasses and 8 legumes, are well balanced, cannot bloat. Nitrogen from legumes keeps grasses dark green and vigorous.

Contains Ladino, Red Clover, Alfalfa, White Clover, Alsike, Ky. Blue, Red Top, Ky. 31 Fescue, Rye Grass, Timothy, Orchard, etc.

Wood's Grain Pasture Mixture

Furnishes more grazing in less time and at less cost than other spring crops. Highly nutritious balanced diet. Cannot cause bloat. Reduces grain feed when costs are high. Saves labor in feeding. Small grains make more growth in cool weather than pasture grass or legumes. Our mixture contains Oats, Rye Grass, Beardless Barley, Wheat and Rye, Dwarf Essex Rape, stays green and palatable in the coldest weather, high in vitamins and relished by all livestock, particularly hogs and poultry. Crimson Clover and Hairy Vetch supply proteins for growth and warmth in cold weather and enrich the soil with nitrogen. The ideal nurse crop for seeding permanent pasture mixtures. Drill 100 lbs. per acre.

100-lb. bag, \$9.00; 5-bag lots, \$8.75 f.o.b.

Wood's Grain Hay Mixture

Makes bumper crops of nutritious hay, easy to cure, relished by all livestock. A balanced ration of protein, vitamins and other food elements. Much more productive and palatable than oats or any other crop sown alone. Ideal nurse crop for seeding permanent grass and clover, as it comes off early. Sow 100 lbs. acre. Fertilize well.

100-lb. bag, \$9.00; 5-bag lots, \$8.75 f.o.b.
